

Siegling - total belting solutions

Movement Systems is a global industry leader for sophisticated conveyor and processing belts, plastic modular belts, top-quality power transmission belts, as well as timing and flat belts made of synthetic materials. These products are known under the brand name Siegling. They are used in a wide range of applications in industry, trade, and the service sector, including conveyor and processing belts in the food industry, treadmill belts in fitness studios, and flat belts in mail distribution centers.

We are seeking a

Vice President Global Operations (m/f)

who is responsible for all manufacturing processes and standards within the Division. He/she is responsible for the implementation of lean manufacturing and for coherent actions along the entire value chain. He/she ensures proper risk management procedures and contingency planning, improves communication and coordination between different functions; creates team spirit and entrepreneurial thinking. He/she is further responsible for all roll production sites and all fabrication sites (Global Production sites reports directly to VP, local sites report to local management, ensures know-how transfers, open communication and effective interfaces across all manufacturing sites globally (roll production and fabrication) and with other divisional functions (e.g. quality and R&D). He/she also ensures compliance with divisional competence regulations and overall company regulations and is responsible for the operations strategy (adjustment of capacity to growth strategy).

Main tasks:

- Develops, updates and implements the global production strategy (roll production and fabrication)
- Defines organizational elements (structure, standards, methods) related to roll production and fabrication
- Initiation of improvement projects in Production (cost, delivery performance, time-to-market, new products, quality)

Siegling - total belting solutions

- Cooperation with Sales and Supply Chain to improve inventory in relation to sales while achieving delivery performance targets
- Establishes annual plans for roll production and fabrication
 - Ensures demand planning across the division
 - Allocates production volumes to the different sites
 - Defines and/or approves all manufacturing investment projects
 - Monitors development of production/product costs
 - Ensures the quality of all plans submitted by the sites as well as their consistency with Group and divisional objectives and guidelines

Your authority:

He/she submits proposal to head of division (in close cooperation with divisional functions and regions), executes, proposes overall plans to head of division, has the authority to implement and adjust processes in plants, is one of the deciders for staff adjustments at plants and one of the deciders for CAPEX at plants.

We offer:

- A range of challenging responsibilities
- Performance-related pay
- Attractive employee benefits
