creating better environments

forbo

FLOORING SYSTEMS

Ergonomics

Marmoleum provides the necessary stability and traction for comfortable foot traffic. Marmoleum offers low resistance to wheeled traffic, providing easier navigation while helping reduce pains and strains related to pushing and pulling when compared to other flooring types.

Infection Control

Marmoleum's ability to inhibit the growth of bacteria stems from the natural raw materials that go into its production. An inherent property of the product, the bacteriostatic qualities of Marmoleum won't diminish over time, giving peace of mind and constant protection from the moment it is installed. Marmoleum is a supplement to and not a substitute for standard infection control practices and has been shown to reduce microbial contamination*, but does not necessarily prevent cross contamination or infections; users must continue to follow all current infection control practices.
*Based on Independent Laboratory Testing

Non Heat welded Marmoleum

Marmoleum, which is naturally PVC and Plasticizer free, no longer requires heat welding to achieve hygienic, water tight seams when installed with Forbo adhesives. This is due to continuing advancements made by Forbo Flooring Systems over the past decades in our water-based adhesive technologies, combined with Marmoleum® TopShield™ occupancy ready factory finish. Independent 3rd party research shows that non heat welded Marmoleum seams are as hygienic as heat welded sheet vinyl saving precious installation time and money.

Cost-effective

Marmoleum is cost-effective. Marmoleum with TopShield pro delivers long-lasting appearance retention and provides the lowest cost of ownership flooring solution over its lifetime. Marmoleum is engineered to withstand heavy foot traffic and has superior scuff and scratch resistance, coupled with the ability to repair the surface if damage occurs. These features, combined with a 10-year no-finish warranty, allows for an industry lowest cost of ownership.
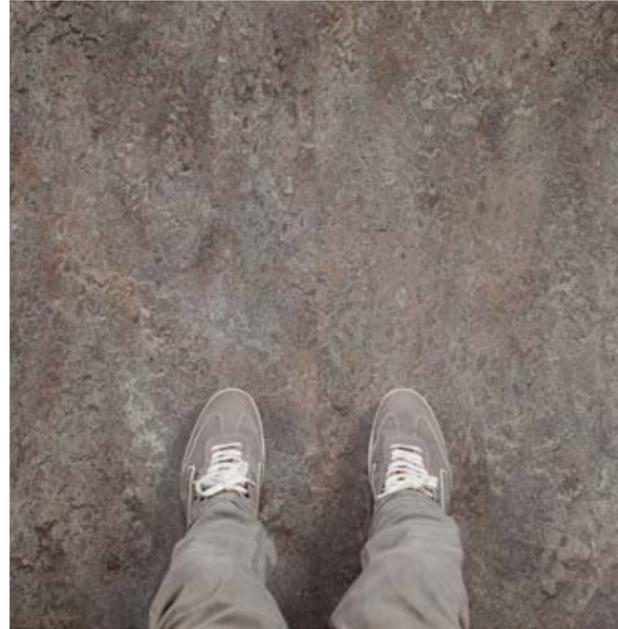

Non-heat welded Marmoleum

topshield™ PRO

3883 | moonstone

Adhesive

Marmoleum is installed into wet adhesive, ensuring a 100% bond to the substrate. This type of installation helps prevent damage from topical moisture, providing a physical barrier to the intrusion of maintenance chemicals. This secure type of installation also helps prevent damage caused by pivot point movements of casters. Forbo offers a wide variety of high moisture resistant adhesives to fit the needs for many projects.

### Naturally PVC, Phthalate and Red List Free

Marmoleum does not contain PVC, Phthalates, or Styrene providing a safe and low emitting floor. Marmoleum can help with LEED, Well, and ILF Living Building Challenge credits.

Durable

Thanks to its natural ingredients, Marmoleum gets more durable over time and features a 30-year System Service Life and a 30- year warranty.

Scratch resistant

Marmoleum is protected by TopShield, a double UV cured, water-based finish that provides occupancy-ready, clean-and-go installation and is repairable. In addition to Marmoleum's 30-year warranty, it also features an excellent 10-year no-finish warranty.

Sound is noise pollution and it can have adverse effects on the human body such as sleeping disorders, stress, headaches, memory loss, aggressiveness and learning difficulties. In fact, the fight against noise is a question of public health, as well as keeping our surroundings comfortable and quiet. That's why acoustic performance is essential when designing a new building or refurbishing an existing one.

A materials impact on acoustics can be measured by how well it can lower background noise levels, serve as acoustical insulation, and reduce the transmission of impact sound, such as footsteps. Marmoleum can help to improve communication, block unwanted sounds, and lower overhead noise.

Marmoleum has one of the highest Noise Reduction Coefficients (NRC) for resilient flooring (sound absorption), provides excellent Sound Transmission Class (STC) (sound insulation) and can achieve an Impact Insulation Class (IIC) over 60 (Marmoleum Decibel six in slab with drop ceiling) reducing foot falls.

marmoleum® decibel
made to order

18 dB

Marmoleum Decibel provides the highest impact sound reduction of 18dB. This sustainable acoustic flooring consists of 2.5 mm Marmoleum laminated onto a 1 mm layer of polyolefin foam. Marmoleum Decibel "made to order" allows the use of any color or structure in Marmoleum possible. Minimum order quantities and lead times apply. Please contact your local sales representative for more information.

Also available from stock in 14 colors selected from the Marmoleum Marbled collection and 13 colors from Marmoleum Concrete, please check with customer service for lead time. Visit **www.forboflooringna.com** for the full range of colors.

Designing with Marmoleum

With Marmoleum flooring you can make the most refined floor designs. Our very precise waterjet cutting technique offers a sophisticated detailing in designs, perfect to create your own identity on your floor; a logo, a text, a piece of art. Or choose tailor made laser engraving, with which your own design can be lasered on the linoleum. Explore your possibilities.

marmoleum®
borders & corners

Marmoleum Borders and Corners are exceptionally precise, water-jet cut, made-to-order design elements that can be used to add unique, custom features to your floor design. Choose your individual color palette in any of our standard configurations. Once a request form is filled out and the product is ordered, standard delivery is within 4-6 weeks. Minimum order is one linear meter of border or one corner.

IMPORTANT Although the various collections can be installed straight (or broadloom), there is no guarantee that the lines from one tile to another will match up during installation. For this reason, it is recommended to first dry lay some of the tiles so that a decision may be made on the arrow direction prior to the start of installation.

flotex® modular
wood

- Waterproof - 100% impervious to water
- Durable - 46,000 upright nylon 6.6 fibers per in², resists crushing and matting
- Easy to Clean - Dense, upright fiber makes it easier to clean (no loops or twists to trap dirt)
- Soil & Stain Resistant - Most spills can be removed, including permanent marker
- Slip-Resistant Wet & Dry - Provides safety and minimizes liability from slips and falls

combination of 6 types of yarn

primary backing

backing material vinyl or latex

nuway®

Nuway engineered entrance flooring is used outside doorways and immediately inside heavily trafficked entrance areas to scrape off the worst of soil tracked in on the soles of shoes or wheeled vehicles. These rigid engineered mats, constructed of profiles, scrapers, and insert materials, are made to the customer's individual specifications.
