

creating better environments

The Flooring Systems division offers a broad and attractive range of environmentally friendly linoleum, highquality vinyl floors, entrance flooring systems for cleaning and drying shoes, carpet tiles, needle felt, and Flotex, the washable textile flooring. Thanks to their excellent technical properties and attractive design, these flooring products are invariably the first choice for public buildings, department stores, hospitals, and other healthcare facilities, schools, libraries, commercial and office spaces, leisure centers, shops, hotels, restaurants, and cafeterias as well as for applications in the residential market. With a market share of over 65 percent, Forbo is the world leader in linoleum.

Flooring Systems also provides ready-made adhesives for flooring installations and ceramic tiles as well as leveling compounds for the construction industry under the trade name Eurocol.

Forbo Flooring UK Ltd are looking to complement our existing Engineering workforce by recruiting two experienced Technicians with relevant exposure within a heavy manufacturing production environment. The successful applicants will have specialised in either an electrical or mechanical maintenance environment and have the necessary experience and exposure within the other field. It is envisaged that we will be recruiting one technician from each field.

Maintenance Engineering Technician

Exhibit a sound Health & Safety work ethic at all times.

Use knowledge and experience of sound engineering practices within a modern production environment to offer front line maintenance support to all production departments on a daily basis.

Carry out PPM across the site as required.

Carry out routine maintenance tasks on Site Services. (Compressed Air Systems, HPHW Systems, Package Boilers, Cooling Towers and Refrigeration Plant).

Fault find & rectify mechanical & electrical faults in a modern production environment to include PLC control systems. Make adjustments as required.

Install, fault find & rectify AC & DC drives.

Be involved in process improvement projects designed to reduce downtime & improve departmental efficiencies.

creating better environments

Reporting to our Engineering Team Leaders the successful applicants will have completed a recognised Engineering Apprenticeship. Have extended their qualification to a minimum of HNC standard coupled with proven experience within a heavy production environment.

This role involves working a 38 hour week within a three shift pattern over a five day week (Mon – Fri). A multi-skilled team of three technicians per shift provide the engineering support to all production departments.
