

creating better environments

The Flooring Systems division offers a broad and attractive range of environmentally friendly natural linoleum, high-quality vinyl floors, entrance matting systems for cleaning and drying shoes, carpet tiles, needle felt, and Flotex, the washable high-tech textile flooring. Thanks to their excellent technical properties and attractive design, these flooring products are invariably the first choice for public buildings, department stores, hospitals, and other healthcare facilities, schools, libraries, commercial and office spaces, leisure centers, shops, hotels, restaurants, and cafeterias as well as for applications in the residential market. With a market share of about 70 percent, Forbo is the world leader in linoleum.

Flooring Systems also provides ready-made adhesives for floor covering installations, parquet flooring, and ceramic tiles, leveling compounds for the construction industry as well as liquid floors under the trade name Eurocol.

The role:

We are looking to complement our existing Engineering workforce by recruiting an experienced Technician with relevant exposure within a heavy manufacturing production environment. The successful applicant will have specialised in a mechanical maintenance environment with some basic electrical experience.

Reporting to our Engineering Team Leaders the successful applicant will have completed a recognised Engineering Apprenticeship with proven experience within a heavy production environment.

This role involves working a 38-hour week within a three shift pattern over a five day week (Mon – Fri). A multi-skilled team of technicians per shift provide the engineering support to all production departments.
