

creating better environments

The Flooring Systems division offers a broad and attractive range of environmentally friendly linoleum, highquality vinyl floors, entrance flooring systems for cleaning and drying shoes, carpet tiles, needle felt, and Flotex, the washable textile flooring. Thanks to their excellent technical properties and attractive design, these flooring products are invariably the first choice for public buildings, department stores, hospitals, and other healthcare facilities, schools, libraries, commercial and office spaces, leisure centers, shops, hotels, restaurants, and cafeterias as well as for applications in the residential market. With a market share of over 65 percent, Forbo is the world leader in linoleum.

Flooring Systems also provides ready-made adhesives for flooring installations and ceramic tiles as well as leveling compounds for the construction industry under the trade name Eurocol.

Objective of the position

Executing design related tasks for the linoleum product portfolio in a dedicated team of product management, innovation and design. Working closely together with R&D, quality department, pilot factory, production and marketing to realize attractive collections, products and services. (Inter)national collaborations with customers, sales organizations and colleagues from other product categories secure a market driven approach.

Junior Designer Linoleum

creating better environments
